EDUCATION OPPORTUNITIES IN NEW UZBEKISTAN ON THE EXAMPLE OF TDPU

Zohida Tuychieva

Tdpu” Methodology for Teaching Social and Humanitarian Sciences
(Fundamentals of Spirituality " Specialty Master of Stage 2 (Disabled Group 1)

Abstract

This article briefly reveals the content and essence of the fundamental reforms carried out in the field of education and education in the New Uzbekistan, the role of youth in life on the example of the Tashkent State Pedagogical University named after Nizami and its students.

Keywords: new Uzbekistan, Renaissance, pedagogical, harmonious generation, educational reforms, education, youth education, people with disabilities, conditions being created for young people with disabilities, etc.

Introduction

It is known that the harmonious generation is a democratic society, the basis of a bright future. As our country follows the path of building a fair democratic state, a free civil society, it is inevitable that this process will raise the upbringing of a harmonious generation in the spirit of humanity to the level of a pressing issue. Therefore, today new Uzbekistan is undergoing a wide range of reforms, practical work in every area, in particular, education, medicine, Court, economy and other areas. In these areas, a number of legislative and legislative acts are being adopted, which is practically the main issue of our state of youth support. In particular, the legislation of the Republic of Uzbekistan, the state youth policy of the Republic of Uzbekistan, the science and scientific activities of the Republic of Uzbekistan and the Education Laws of yangitahrir, the OECD regulations of the president of the Republic of Uzbekistan, the development of Science by 2030, the strategy of actions for the yanadarivojjiyoyev on February 7, 2017, the OECD strategy for the development of Science by 29 October 2020 concept validation, The decrees of January 28, 2022 “on the new Uzbekistonningtaraqiyot strategy for 2022 - 2026” have been instrumental in promoting the field of education and science in our country. Reforms in the field of Education, which are being implemented in our country today, are also consistently implemented in the University where we study. In particular, in the following years, special attention is paid to education in educational areas and graduate specialties. Our mentors pay special attention to improving the quality of education and education by introducing new pedagogical technologies into the educational process. Because the content of education is in every way maturing, maturing enlightened personnel, coming of age is an educational institution, and from the teacher, high talent is required. This talent is intended to be aimed only at the knowledge of the teacher, for which the teacher will keep up with the public sphere. Each lesson is prepared with special responsibility, which is the sacred duty of the teacher. Knowledge, experience, professional skills, skills are important indicators that increase the effectiveness of literati. As noted in our President Shavkat Mirziyoyev's call at the solemn ceremony

dedicated to the teacher and coach on September 30, 2020, “we have set ourselves the goal of creating a new renaissance in a wide range of democratic changes, including educational reforms, including a new renaissance in modern Uzbekistan, the foundation of the YA'niuchinch Renaissance”. Also at this meeting, our president said that “we should consider the problem of the school as a first-class issue. School - not only teaching, but high spirituality for all of us, it is necessary to transform our children from childhood into professional pursuits”. It's not for nothing. Because the greatness of the moment is first of all stepped on the threshold of the school. It can be said that the school is a great training center. Judging by the opinion of the famous Greek philosopher Socrates that “the owner of sharp minds and thoughtful, honest thoughts is happy,” it is also possible to raise, develop our homeland, add it to a number of developed countries of the world today, in the hands of thousands, millions of young people studying in our countries. To do this, students are required to have such a sharp mind, thoughtful thinking and observation, to be able to make the most of the opportunities given and to be involved in the fate of the motherland, el, the land. These qualities in them, on the other hand, are undoubtedly formed through the education that teachers, mentors, mentors give. At this point, I can say with pride and pride that teachers of this school, future teachers of this school, are prepared precisely in our education, that is, at the Tashkent Pedagogical University named after Nizami. We have every reason to say that every teacher of the university, so to speak, every student feels deeply in the heart. The contribution of this resident in the educational institutions of our country is significant. Naoyon the talents of students in the areas they want, for which a wide range of opportunities has been created. The leadership of the university provides all-round conditions for the deep vakeng-inclusive education of all students. Therefore, students of our university are participating in various competitions of the Republic and international level, taking proud places. In particular, in the field of sports, in the field of Applied and Visual Arts, in the direction of music and reading, the salmakliyutuqari of the students of our university is proof of our opinion. In particular, in 2018, the Republican stage of the “young reader” competition held by the Youth Union of Uzbekistan, the 3rd stage of the Tashkent State Pedagogical University, Shahsanam Kholboyeva, applauded the victory and became the presidential gift “Spark” avtomobiligasazovor. In 2021, Farrukhfayzullayev, master of the specialty “methodology of teaching social and humanitarian Sciences (fundamentals of spirituality”) of the TDPU, took the Proud third place in the Republican stage of this competition. Moreover, when I myself studied at the Tashkent State Pedagogical University “National idea, fundamentals of spirituality and law education” in the direction of undergraduate education, I entered the proud 3rd place in may 2020, taking part in the onlyn stage of the Interuniversity ALLA examination competition in the context of the pandemic. These results are visible to the fact that university students are not only gifted, but also learned young people. Our peers demonstrate their knowledge at various Science Olympiads in the Republic and the international community and win prizes. Of course, there is a special place in this for our teachers and teachers who teach us and share their love and professional skills with their students. In its place, I would like to note that the head of our state pays attention to the further prosperity of our hamuniversity. It was in order to improve the quality of education at the Tashkent State Pedagogical University named after Nizami, to introduce advanced educational programs at the university, to improve the effective system of training of highly qualified specialists with hamdazamonal knowledge and pedagogical technologies, that a special decision of the representative of the Republic of Uzbekistan Shavkat Mirziyoyev was adopted on June 21, 2022 “on additional measures This decision was also adopted in birqator “2022-2026 Nizami named after

the Tashkent State Pedagogical University” transference and complex development program”. In this program, such tasks as “physical conditioning of students and providing them with the necessary conditions for the manifestation of their abilities in sports”, “historical figures are among the heroes of vaxhalq students and youth”, “additional conditions for student-youth education”, “improving their spiritual and educational work” were given priority., this shows that in our country there is a significant share of the Tashkent State Pedagogical University in the Charter of education of a generation of intellectual potential. Before finalizing my thoughts, I would like to summarize another example of the most honorable events in my life, which is the practical Islam of the fact that education reform in New Uzbekistan is also being accepted in my life as a student of the Nizami. That is, in accordance with the decree of the Cabinet of Ministers of Uzbekistan No. 417 of June 2, 2018 about “persons with disabilities in educational institutions” on the basis of quotas of the state grant, I was admitted to master's degree in 2022. With this, I would like to note separately that all conditions have been created in the process of obtaining education for persons with disabilities in our country. In particular, Regulation No. 417 of June 2, 2018 “on the admission of persons with disabilities to higher education institutions on the basis of an additional state grant 2 percent quota” establishes that all persons with disabilities will be admitted on the basis of an additional 2 percent quota. Resolution No. 641 of November 15, 2020 “on the rights of Persons with Disabilities” defines the rights that guarantee that these persons will carry out their activities in all areas of our society. Persons with disabilities, like all young people, have the right to education in the area they want. While in the academic year 2022-2023, 173 persons with visual disabilities were admitted to the graduate process of the higher education institution, in the academic year 2023-2024, individuals with disabilities were also given a special attention. In addition, the admission of women to the graduate stage of higher education in the field of education in higher educational institutions in our country, on August 15, 2022, the Presidential Decree No. 447 “on the payment of contractual sums of women studying under the post-graduate payment contract of Education” was adopted. Also, by the decree of the Cabinet of Ministers No. 447 of August 15, 2022, the state approved the procedure for reimbursement of the number of payments and contracts of women receiving and receiving education on the basis of a payment contract to the Ommagistratura stage of the state budget funds. According to the charter, all women studying in the magistracy of State equipments are reimbursed without the provision of contract payments. All this, in addition to the fact that the world gives me joy, pride, imposes exaltation and responsibilities on me. Now I have to read, seek, approach my knowledge and respond to the conditions created for me in our country and at our university.
