ANALYSIS OF MODERNIZATION PROCESSES IN SPIRITUAL LIFE OF NEW UZBEKISTAN

Pardayev Rahmon
TerDPI 2st Year Graduate Student

Abstract

This article presents suggestions and comments on spiritual and educational reforms, their role in the life of our society, which are being implemented in New Uzbekistan within the framework of the "Strategy of Movements".

Keywords: New Uzbekistan, "Strategy of Actions", mass culture, educational system, spiritual heritage, priority direction, extremism, terrorism.

After our country gained independence, wide prospects for economic and social development, cultural and spiritual renewal opened up. Today, the development of spirituality and enlightenment in the life of our society is considered as one of the most priority directions of state policy. Spiritual renewal has been serving us to achieve effective results in the strategy of life-giving reforms implemented in our country. The following comments of the head of our state Sh. Mirziyoyev about the relevance of this reform strategy are noteworthy: "In order for common sense and healthy strength to be the priority in our society, we must improve our spiritual life, protect the population, especially the youth, from various harmful effects, It is necessary to regularly think and actively work on educating people to become mature people in all aspects. The reforms we are implementing in this regard, in particular, the practical measures aimed at increasing the efficiency of spiritual and educational work, further developing the activities of cultural and art organizations, creative associations and mass media, and properly appreciating the work of industry workers, are good for you. "Yes, of course."

At this point, in the speeches delivered by President Sh. Mirziyoyev at the 72nd session of the UN General Assembly on September 19, 2017, he emphasized that the need for the entire world community to raise the morale of humanity is more urgent than ever. they did. At the same time, the head of our state spoke about the need to eliminate global issues that threaten the world, such as international terrorism and extremism, not by using force, but on the contrary, by forming the mindset of young people on the basis of enlightenment and educating them. They proposed the adoption of a special resolution called "Enlightenment and religious tolerance". Today, the issue of spirituality and spiritual renewal is always relevant for Uzbekistan in building the foundations of a strong civil society, and great attention is being paid to solving it at the national level. Therefore, the state policy on spirituality has been consistently implemented in our country.

As priorities of state policy in the field of spirituality, active reforms are being carried out in the following areas:

- a) Recovery and deep study of spiritual heritage;
- b) Creating the latest history of Uzbekistan;
- c) Development of the education system;
- d) Ensuring the development of science and technology;
- e) Raising a perfect person.

Our current noble reforms, in addition to renewing the life of the society, encourage it to go on the path of unprecedented growth in its development. Therefore, it is no coincidence that in independent Uzbekistan, raising spirituality, regular implementation of spiritual and educational activities has become one of the important tasks facing our society. In this regard, in recent years, a number of decisions aimed at raising spirituality have been made, many activities are being implemented, a new concept of education and training work has been developed, and the most important and important thing is to raise the attitude to spirituality to the level of state policy. served to further increase the practical significance of the research. These life-giving reforms and their intensity have covered all aspects of the spiritual life of the society, and the practical results are being seen accordingly.

Therefore, the decision of the President of the Republic of Uzbekistan dated September 13, 2017 "On the program of comprehensive measures to develop the system of publication and distribution of book products, increase and promote book reading and reading culture" , the Decision of the President of the Republic of Uzbekistan dated February 14, 2017 "On measures to establish the International Research Center of Imam Termizi", the Decision of the President of the Republic of Uzbekistan dated August 2, 2017 "Under the Cabinet of Ministers of the Republic of Uzbekistan" The decision of the Cabinet of Ministers of the Republic of Uzbekistan "On the organization of the activities of the Islamic Culture Center in Uzbekistan", that on September 6, 2017, the opening ceremony of the newly established Bukhara Higher Madrasa was held in the Bahauddin Naqshband complex in Bukhara, 2017 On November 10, the opening of Bahauddin Naqshband Mystical Scientific School at the Mir Arab Higher Madrasa located in Bukhara region serves such noble purposes. layotir At the core of our updates, goodness and enlightenment are in harmony. Among such updates, agreements were reached on the establishment of branches of the Moscow Institute of Steel and Alloys and the Webster University of the United States in our country. "Friends clubs" were established in cooperation with "Ilhom" public fund to support the creators of Uzbekistan, as well as cultural and art institutions, large companies and banks. The adoption of the decision of the head of state "On the establishment of the Avenue of Writers in the territory of the National Park of Uzbekistan named after Alisher Navoi" is another bright expression of attention to our literature, our people, and our future. It's done.

In accordance with the decision, to turn the National Park of Uzbekistan named after Alisher Navoi into an all-round beautiful and unique place that serves to raise the cultural and educational level of our people, first of all, our youth, and is visited not only by our country, but also by guests and tourists from different countries of the world. In order to perpetuate the

historical memory of famous artists who left an indelible mark on our spiritual life, Adiblar Avenue is being built in the park. Such examples can be continued for a long time.

The most important thing is the adoption of President Sh. Mirziyoyev's decision PQ3160 on July 28, 2017 "On increasing the efficiency of spiritual and educational work and raising the development of the field to a new level". We will not be mistaken if we say that this decision made a new radical turn in the spiritual and educational sphere.

In this decision, the Republican Center for Spirituality and Enlightenment and its regional departments are instructed to comprehensively cover the essence of the complex geopolitical and ideological-ideological processes taking place in the world, terrorism, religious extremism, fanaticism, separatism, human trafficking, "mass to carry out an effective ideological struggle against culture", drug business and other threats, to put an end to the internal threats that prevent the stable development of our society - indifference to the fate of the country, localism, tribalism, neglect of family values and youth education giving is strictly defined.

Also, it was emphasized to introduce a proportional, purposeful and meaningful approach in propaganda work, taking into account the regional, professional and age characteristics of the population. The center is tasked with fundamentally improving the content of spiritual and educational promotion work, expanding their scope and scale, consistently improving the knowledge and skills of the employees of the sector operating in the system, paying for the labor of employees at the district (city) level. Tasks such as establishing a stable system of training, coordinating the work of institutions and organizations operating in the field and increasing their efficiency were set. In particular, youth education in family, neighborhood and educational institutions, purposeful ideological and educational work with unorganized youth in remote areas and neighborhoods is carried out in a superficial manner, mistaken involvement in crime, religious extremism and terrorist activities, neglect of national values. , early marriage, family divorces, etc., are not giving the expected results in most cases, so these issues require serious attention.

On the basis of the new and pragmatic policy pursued by the head of our state, the field of spirituality and enlightenment is objectively and critically evaluated, special attention is being paid to the actual task before us and the work being done. About this, President Sh. Mirziyoyev stated the following during his meetings with representatives of creative intellectuals of Uzbekistan: Decisions and orders were also adopted on the improvement of the field of art, the establishment of creative schools and centers named after our great artists in the regions.

Speaking about this, the Alley of Writers is being built in Tashkent, where memorial complexes dedicated to the great figures of our literature are being erected, as well as the great enlightener Ibrat in the Namangan region, famous artists Hamid Olimjon, Zulfiya and Sharaf Rashidov in the city of Jizzakh, and in the Khorezm region. It should be noted that works are being carried out to perpetuate the memories of the fire-breathing hafiz Komiljon Otaniyozov, Hero of Uzbekistan, People's Poet Ibrayim Yusupov in Nukus, Erkin Vahidov, Abdulla Oripov, Muhammad Yusuf in Fergana, Kashkadarya and Andijan regions. As a logical continuation of these works, a number of measures are being taken to reveal the talent of young poets and writers, actors, artists and singers, journalists, and to show them attention and care. In 2017-2021, the state program of the action strategy on the five priority directions of the development

of the Republic of Uzbekistan, which is expected to be implemented in the "Year of supporting active entrepreneurship, innovative ideas and technologies", serves the following spiritual upliftment. we can show the measures to be taken.

In short, spiritual growth in each historical period affects both society and human activity. As the first President Islam Karimov said: "Spirituality is as necessary for a person as air and water. A tourist in the desert always quenches his thirst from a spring. In the same way, a person searches for the source of spirituality with many sufferings and difficulties. After all, renewing and enriching spirituality is an important condition for strengthening national independence. Therefore, our reforms carried out within the framework of the strategy of actions, first of all, serve to carefully preserve the independence of our country, its spiritual foundations, to educate our population, especially the young generation, in the spirit of national and spiritual value, loyalty to our traditions. As the head of our state, Sh. Mirziyoyev, noted, "We are all citizens, society, and the state, for the development of our homeland, for strengthening peace and stability in our country, for preserving, enriching and enriching our historical, spiritual and cultural heritage and passing it on to future generations." We are responsible."
