Annotatsiya:

nogiron bolalar-bu alohida e'tibor talab qiladigan qatlam. Ushbu maqola o'quvchilarga o'qish darsini nogiron bolalarga tushuntirishda yangi pedagogik texnologiyalardan foydalanishni ko'rib chiqadi. O'quvchilarga o'qish darsini tushuntirishda yangi pedagogik texnologiyalardan foydalanish yaxshi samara beradi. "O'qish uchun kitob" boshlang'ich maktab darsliklariga kiritilgan aniq mavzular o'quvchilarni badiiy adabiyotning sirli dunyosiga jalb qilishlari, ularning dunyoqarashini milliy mustaqillik mafkurasi asosida to'g'ri shakllantirishga qaratilganligi bilan belgilanadi.

Kalit so'zlar: Nogiron bolalar, o'qish darsi, innovatsion texnologiyalar, interfaol usul, uslub.

Reading lessons for children with disabilities according to their essence, goals and tasks has a special place in the education system. because in his land literacy and moral-educational the

basics of education. therefore, the education of other subjects is without education can't imagine. the student reads the text correctly, quickly, with understanding, mastering the content for the first time they face in their classes. state education standard (dis) of our students with reading classes educational and cognitive skills that are expected to be acquired according to the requirements and the way is opened for them to acquire knowledge. precisely in the flow education of a person. first of all, the smallness, moreover, their aspirations to understand the world are encouraged. for this purpose, the "reading book" textbooks include mother nature, the universe that surrounds us, the history and present image of our country, life of adults and children, hard work, independence and Atrolicha on various topics such as national values, friendship of peoples and peace art intended to give insights. moral-educational, scientific-popular works is introduced. a Fluency lessons teach students with syllables, words and sentences during the literacy period introduction and reading technique, if they are organized in the form of a story based on pictures After mastering, the flow is selected on specific topics. popular science is carried out on the basis of texts. the students of the specific topics included in the "Aksh Book" textbooks introduction to the magical world of fiction, worldviews, national independence ideology is determined by focusing on the correct formation. accordingly, of reading lessons The main feature is to ensure the literacy of the educational material, while also encouraging the students based on ideology, it focuses on education in the spirit of high moral values. of the works organized in reading lessons of classes of children with disabilities The range of topics is quite wide, they are mother nature, seasons, folklore, work general topics such as love, major holiday dates, national independence and spirituality within the framework of gan. Selected subjects for reading lessons are daily for children with disabilities knowledge and education about life, strengthening independence and human relationships intends to give. among these are topics about independence, homeland, spirituality and nature annotation: children with disabilities are a group that requires special attention is considered in this article to the students of the reading lesson for children with disabilities in the explanation, the use of new pedagogical technologies is considered. use of new pedagogical technologies in explaining the reading lesson to students it works well. specific included in primary school "reading book" textbooks themes bring readers into the mysterious world of fiction, national worldviews determined by the focus on correct formation based on the ideology of independence. key words: children with disabilities, reading lesson, innovative technology, interactive method, method. making the young generation, which is our future, mature and perfect in all aspects education is one of the most important issues for our people since ancient times has been these by our scholars who lived in the Middle Ages we can know and learn from the created scientific works. Abu Ali Ibn Sina amir Timur, Alisher Navoi, Abu Raihan Beruni. al Khorazmi, Abdullah avloni such as great thinkers in their various disciplines teachings with a huge legacy to the treasury of world science and culture those who left As our great grandfather Alisher Navoi said, every person is a school while possessing it, he should study it perfectly and pass it on to the future generations. who used to honor the owners of the school. to them in our country as well respect that is respect increased even more. present knowledgeable, independent in our day thoughtful, creative seeker, highly skilled, cultured, creative, self-employed skilled craftsmen are in greater demand in our independent republic of Uzbekistan. stands out. their

goal is to understand the minority, independence, motherland and nature is to evoke feelings related to Learning activities that are important in human life are in all subject classes is done. but teaching to read guides develop a reading methodology. reading methodology, overall development of young students, psychology. private will be improved based on achievements in the field of methodology. the effectiveness of the reading lesson depends largely on the correct choice of teaching methods therefore, study methods, like science itself, are constantly evolving. for example, if in old schools, reading was conducted on the basis of rote memorization method, now It is conducted on the basis of 12th reading. to comment on the words in the text in the memorization method, to explain the meaning, to retell what was read, in general, the conscious reading absolutely paid attention to. they have more correct pronunciation, recitation, expressive reading is implied. Currently, education in schools for children with disabilities is based on the 12-point system As it is being conducted, the following question arises: What is the 17-digit reading? in elementary school reading classes mainly poems, parables, fairy tales, stories, legends, proverbs and riddles, popular scientific works are studied. of course, theirs each created in its own unique form, style and content. therefore also to every genre it is recommended to read and learn related works in a unique way One of the methods that is close to the 12-point bird of art is the Jodi reading. ataqh Methodist scientist N. Lkudryashov includes the following working methods in the creative reading method: a) the interpretation and reading of the literary text by the teachers and the reading of the work by the students and with the aim of providing them with the deepest, most emotional perception possible catch word: b) in the process of researching the work by the students after the teacher has read the work aiming to activate innate artistic experiences it seems that the normal reading is a straight text, unlike the 1-syllabic flow requires a unique approach to uncovering its essence. for example, in the 4th grade of A. Oipov Studying the work "The Story of the Farmer and the Thirteen Boys" based on the method of creative reading in the process, based on the content of the text and the ideological intention of the poet, in the regions of our homeland comprehensive understanding of national characteristics related to the way of life of the population is given. In the 2nd grade, "woodcutter guy", in the 3rd grade, "khazonchinak" of Otuk Hashimov, in the 4th grade, s. teaching Anorboev's "cowardly" works based on the method of creative reading has positive results will give. study hard. logical reading in the primary education system (reading the text correctly, understanding it quickly (moderate) reading) and literary reading from mastery to expressive reading will be passed. it also includes expressive reading of memorized poetry. expressive the success of reading is about the content of the work, ideological and artistic features of the students related to having a certain understanding7 expressive reading with the help of intonation tone, the idea and charm of the work is correct, clear. is to be able to express according to the writer's intention. expressive reading literature clearly and is the first and main form of visual education," says the Methodist scientist m.a. ribnikova. therefore, "the main task of expressive reading is to understand the content of the work and is to demonstrate his emotionality to the students through intonation. expressive the main principle of reading is a deep understanding of the idea and artistic value of the read work".
